

You are cordially invited to the Michigan Business Objects User Group (MIBOUG) on Friday, May 18, 2007 at the Embassy Suites in Southfield, Michigan.

Membership is free and open to all Business Objects and Crystal Reports professionals, from end users to technical staff. Network with your peers and gain valuable (some would say Xtreme) insight to get the most from Business Objects products. Please bring business cards to share with peers and enter door prize drawings.

Visit the event web site at <http://www.busobjects.com/usergroup/detail.php?EventID=231> for additional details and to register.

AGENDA

(subject to change without notice)

8:00 - 8:30 AM Registration / Networking Breakfast

8:30 - 9:20 AM Data to Dashboards

Quaid Saifee, WIT

Gain extreme insight into the behind-the-scenes tasks that result in effective dashboards. Not sure how to get started? Find out a step-by-step approach using a proven methodology for the successful implementation of performance management solutions from Business Objects. This presentation will feature live demonstrations of dashboard creation to show the development process.

9:20 - 9:30 AM Break

9:30 - 10:20 AM BI in the County Jails

Alan Jackson, Dataspace

How can Business Objects be used to help manage the population of a jail? Very effectively, as it turns out. Alan Jackson will discuss Dataspace's experience in conceiving, building, and implementing a data warehouse and business intelligence system used by Oakland County, Michigan to help ease overcrowding the county's jail faces on a regular basis.

10:20 - 10:30 AM Break

**10:30 - 11:20 AM Let There Be Light
Business Objects XI Release 2 – Productivity Pack**

Dan Robertson, Senior Sales Consultant, Business Objects

A user revolution has started. We aren't just talking about new features or tools - we're talking about a completely new way of looking at how to deliver intelligent information anywhere that a decision maker needs it. The combination of tools and services in Productivity Pack can drive BI throughout your organization and enable users to access and visualize data that is tailored to meet their needs, even on mobile devices. See and hear how new innovations like Query as a Web Service, Voyager OLAP, and an updated Live Office can help you more easily find the exact information you need to improve decision making and optimize business performance.

**11:20 - 12:00 PM Evaluations and Door Prize Drawing
12:00 PM Event Concludes**
