Business Intelligence and Data Science Staffing

Our Company *Dataspace provides specialized, cost-effective expertise in big data, business intelligence, data science, predictive analytics and data warehousing for organizations nationwide.*

Dataspace brings over 25 years of experience in delivering skilled big data professionals for industry-leading companies. Unlike generic recruiters, our expert team has specialized knowledge of big data technologies and how to swiftly identify experienced and competent talent. Our approach to staffing is both engaged and considered; we ask the right questions to learn about your goals, your organizational culture and the challenges you face in harnessing the power and utility of your data assets. Candidates are interviewed by experts with 25+ years of experience in business intelligence, data science and data management, not by traditional recruiters.

Our clients, some of the largest companies in the US, note a significant difference in quality between Dataspace contractors and those provided by general purpose staffing companies.

What we provide

- **Consultants** in all BI, Data Science, Data Warehousing and Big Data skill areas
- **Highly selective screening process** – all candidates are reviewed by experts in data technologies and data management best practices (our screening yield rate is under 5%)
- **Competitive pricing** – comparable to other staffing providers and commensurate with the quality of resources
- **Rapid onboarding process** – we can have consultants on-site in two weeks or less
- **Contract-to-hire** available
- **Geographic flexibility** – our resources can work on-site at your facilities, even in remote locations
- **Soft skills assessment** – we ensure candidates possess strong written and verbal communication skills and are able to fit comfortably into your organizational culture
- **Continuous engagement** – we stay with you throughout the hiring process, from resume screening to project completion. Rather than just dropping resources at your door, we remain involved over the lifetime of your project ensuring that your requirements are met

Technology skill areas Dataspace has extensive experience with a wide range of data management technologies to accommodate nearly any endeavor. We can help with any available technology including **SAS, Microstrategy, Teradata, Hadoop, Tableau, Qlik, Business Objects, Informatica** and more.

Is your current staffing provider letting you down in the data and analytics realm?
